

**GSWEC Student Practicum Guide  
For 2nd Year Practicum Placements in 2024-  
2025**

# GSWEC Student Practicum Guide

(Geriatric Social Work Education Consortium)

The GSWEC Student Practicum Guide was developed to assist social work graduate students interested in developing skills in and specializing in services for and with older adults and their families to select and participate in an eligible practicum placement.

GSWEC (Geriatric Social Work Education Consortium) is a collaboration among eight Graduate Schools of Social Work and fourteen community agencies specializing in services for older adults. It was established in 1999 to provide aging-focused 2nd year practicum placements and competency- driven geriatric social work practicum education. This guide includes:

GSWEC practicums are structured to provide social work graduate students with a well-rounded experience serving older adults.

## **The GSWEC Consortium Includes:**

### Southern California Graduate Schools of Social Work (8)

- Azusa Pacific University
- California State University, Dominguez Hills
- California State University, Fullerton
- California State University, Long Beach
- California State University, Los Angeles
- California State University, Northridge
- University of California, Los Angeles
- University of Southern California

### Centers of Excellence in Geriatric Social Work Practicum Education (14):

- AltaMed
- Alzheimer's Los Angeles
- Alzheimer's Orange County
- Beach Cities Health District
- Huntington Health
- Jewish Family Service
- Motion Picture and Television Fund
- Pacific Clinics
- Partners in Care Foundation
- SCAN Health Plan
- Special Service for Groups/SILVER
- VA Greater Los Angeles Healthcare System
- VA Long Beach Healthcare System
- WISE & Healthy Aging

<https://www.gswecnow.org/internship-opportunities/>

# GSWEC FAQs

## **What advantage is there for me to be in GSWEC?**

- GSWEC is well recognized among employers and GSWEC alumni are sought after as employees.
- GSWEC students receive supplemental training in Geriatric Social Work, guided by nationally recognized geriatric social work competencies developed by GSWEC.
- GSWEC students experience micro, mezzo and macro practice.
- GSWEC students gain a broader practicum experience with Associate Site rotations.
- GSWEC students have the opportunity to network with other GSWEC students and alumni.

## **What practicum placement settings does GSWEC offer?**

GSWEC offers micro, mezzo and macro placement opportunities at its fourteen Geriatric Centers of Excellence practicum agencies. Placement settings include:

- Mental Health
- Health Care and Health Promotion
- Geriatric Care Management
- Adult Day Health Care
- Dementia Care and Caregiver Support
- Substance Abuse Treatment
- Senior Services Administration
- Civic Engagement and Volunteerism

## **What is GSWEC's "Competency-Driven Education"?**

GSWEC developed "Geriatric Social Work Competencies" as a foundation for geriatric practicum placement experiences. GSWEC Practicum Instructors and students use the competencies to identify the student's learning goals, and to provide the basis for learning assignments and assessment of the student's progress. The competencies emphasize geriatric social work values, knowledge, and skills encompassing micro-to macro-level practice in four general areas:

- Values, Ethics and Theoretical Perspectives
- Assessment
- Intervention
- Aging Services, Programs and Policies

## **What Are GSWEC's Geriatric Social Work Seminars?**

All GSWEC students participate in three (3) free, full day Geriatric Social Work Seminars during the placement year. The seminar location may be virtual or in-person and local travel to other sites may be required. Seminars typically include presentations by, and discussions with, academic and professional experts, Practicum Instructors and GSWEC alumni. The seminars broaden students' learning and provide exposure to many facets of Geriatric Social Work. Topics vary from year to year, but typically include subjects such as:

- Biopsychosocial Aspects of Aging and Impact on Older Adults and Their Families
- Normal and Abnormal Cognitive Changes in Aging
- Assessment, Diagnosis and Treatment of Older Adult Mental Health Issues
- Cultural and Age Cohort Diversity
- Older Adults and Substance Abuse
- Palliative and End of Life Care

### **Do GSWEC placements offer stipends?**

Most GSWEC agencies provide stipends of \$4,000. Two agencies (Pacific Clinics and VA Health Systems) provide \$5,000 or more. Some agencies withhold taxes, others do not. Some pay biweekly, some at different intervals. See the [Agency Program Descriptions](#) in this guide and check with agencies for details regarding stipends.

While it is our goal to have GSWEC students work in geriatric social work after graduation, there currently is no employment obligation incurred. However, GSWEC agencies are always eager to hire GSWEC graduates!

### **Are GSWEC students eligible for CAL-SWEC II Mental Health stipends?**

Yes, if the GSWEC placements meet the criteria for CAL-SWEC II Mental Health stipend. If you receive the CAL-SWEC II Mental Health stipend it will be in lieu of the GSWEC stipend.

### **How can I apply for GSWEC?**

1. Obtain an application from the GSWEC liaison at your campus.
2. **Attend the GSWEC Open House on February 7, 2024, from 2:30-4:30pm virtually via Zoom** to learn more about GSWEC and placement opportunities.
3. Submit the GSWEC Application to your campus GSWEC Liaison by your School's deadline.
4. Arrange interviews with GSWEC agencies that interest you.

### **Can I interview at more than one GSWEC agency/site?**

Yes, you can — check with your School as to the number of interviews allowed. Most GSWEC sites require an interview but some hold an Open House instead. Before you schedule site interviews you should review the GSWEC Guide to get basic information about agencies and sites and make a preliminary phone call to get more information about placement opportunities. This will help you more effectively focus your placement search.

### **What does GSWEC look for when selecting Applicants?**

- Students who have a respect for older adults
- Students who have a desire to work with and on behalf of the aging population.
- Students with leadership qualities

### **What are Site-Specific Requirements?**

Specific requirements vary among placement sites, such as fingerprinting, physical exam, specific language fluency or U.S. Citizenship. Many also require an on-site interview. See Practicum Placement Opportunities in this GSWEC Guide and check with the agency for details.

### **What should I take with me to the agency interview?**

You should take a copy of your GSWEC application and your resume. Also remember that a professional appearance will help you present a positive image.

# **AltaMed Health Services – PACE Program**

## **Opportunity:**

With a foundation in active civic engagement, AltaMed's mission over the last 50 years has been to eliminate disparities in health care access and outcomes by providing superior quality health and human services through an integrated delivery system for Latino, multi-ethnic and often-overlooked communities in Southern California. AltaMed serves the entire family with primary medical care, dental clinics and complete senior long-term care services, including primary care clinics, senior case management, and the Program of All Inclusive Care for the Elderly (PACE). AltaMed also delivers disease management programs, health education, youth services, specialty HIV/AIDS care and substance abuse treatment. This internship will allow students the opportunity to work in one of our eleven PACE programs located across Los Angeles and Orange Counties. The programs provide 24/7 care to enrolled participants and are in: Long Beach, South LA (Watts), Huntington Park, Lynwood, Norwalk, Covina, El Monte, East LA, DTLA/Chinatown, Anaheim, and Santa Ana. AltaMed/PACE is recognized as one of the nation's most innovative providers of all-inclusive medical and social services. AltaMed offers a distinct type of senior services to enable chronically ill and frail seniors to live safely and with dignity in the comfort of their own home while receiving essential health care services. Placement with the PACE program will allow students to integrate their classroom education into direct practice through bio-psychosocial assessments, care plan development, case management, community-based linkages and referrals, discharge planning, psycho-educational and therapeutic groups, and working as part of an interdisciplinary team. The students will also have the opportunity to work with families and caregivers of the program participants through engagement in the assessment process, discussion about advance life planning, and collaboration around individualized care plans.

## **Unique Aspects of Placement:**

The PACE program model is centered on the belief that it is better for the well-being of seniors with chronic care needs and their families to be served in the community whenever possible. Enrollees must be 55 or older, live in a geographic area served by the PACE program, and be able to live in the community safely without jeopardizing his or her health. Additionally, while all PACE participants must be certified to meet nursing home care criteria to enroll in PACE, only about 7 percent of PACE participants nationally reside in a nursing home. If a PACE enrollee needs nursing home care, the PACE program pays for it and continues to coordinate the enrollee's care. The services provided to a PACE participant include: • Adult day care that offers recreational therapy and nutritious meals • Transportation to medical appointments and the adult day care site • Physical and occupational therapies • Dietary/nutritional counseling • Social services and counseling • Nursing and acute symptom management • Primary medical care services • Home care services and supports • All necessary prescription drugs • Palliative care • Medical specialties such as audiology, dentistry, optometry, podiatry and speech therapy • Respite care; and • Hospital, nursing home, and hospice care when necessary. The students placed with the AltaMed PACE program will have the unique opportunity to work with frail seniors and their families and be exposed to this vulnerable population's needs. AltaMed PACE is committed to providing professional development through ongoing trainings on quality improvement initiatives, process improvement, resume building, and supervision with experienced Social Workers. # **Alzheimer's Los Angeles**

## **Opportunity:**

Depending on the project/area that the student selects, they will have the opportunity to observe and learn about people experiencing Alzheimer's disease and related dementias. They will develop a deep knowledge of the symptoms and progression of the disease and how families and friends cope with a loved one's diagnosis. The student might lead one of our early-stage groups and participate in developing our annual Early Memory Loss Conference. They may decide to focus more on working with individuals and families who are caring for someone in the Middle or Late stages of the disease, a time when behaviors can be very challenging. Carrying a clinical caseload includes providing ongoing support, disease education, coaching the caregivers on new ways to respond to the person with dementia, and ensuring that they are connected with community resources. Or the student might want to spend time out in the community, making connections with other providers, programs and agencies that also serve our clients, as well as delivering educational talks to the general public about Alzheimer's disease or a specific aspect of dementia. If the student is interested in working with diverse communities, we offer opportunities to network with, and deliver services to, the African American community, the Asian American/Asian-Pacific Islander community and the Latinx Community. For those who have an interest in public policy, visits to legislators to advocate for people affected by Alzheimer's disease might be part of their experience as well as learning more about the role local, state, and national government plays in the lives of our families. And a student looking into a more macro focus may have the opportunity to work on such areas as program evaluation and outcomes, data collection or service mapping in order to determine how resources should be spent.

## **Unique Aspects of Placement:**

Whether someone is interested in direct practice or macro work, the best part about being at Alzheimer's Los Angeles is the variety of opportunities available to students. In addition to training students to become dementia care experts, an area of geriatric social work which is of critical importance in the upcoming years, we are able to match students' interests to the services we provide, and they actually have a voice in how their placement will unfold. The entire staff are invested in making their time here a positive and meaningful learning experience, and the social workers that supervise the students have years of experience behind them. That are committed to the students' learning and make themselves available to the students far beyond the weekly supervision hour. At Alzheimer's Los Angeles, we offer individualized support and guidance, while giving students abundant opportunities for exploration and growth.

# **Alzheimer's Orange County**

## **Opportunity:**

At Alzheimer's Orange County (AlzOC), GSWEC students will begin their internship with robust training to become dementia care specialists. GSWEC students will then have opportunities to conduct assessments, provide supportive counseling, link to services, and participate in support groups. Services may be delivered through office visits, home visits, or telehealth. AlzOC is committed to providing quality learning experience while also committing to the safety and welfare of our constituents, staff and interns.

GSWEC students may also participate in the following additional opportunities:

- Telephonic and in-person support in the form of providing information, referrals, and care consultations for individuals and families impacted by memory loss
- Administration of Cognitive Screenings and associated education and linkage
- Facilitate groups for individuals and families impacted by memory loss, such as support groups, psycho-educational classes, and other activities
- Support multicultural community outreach education initiatives
- Supporting constituents and initiatives connected to AlzOC's two Adult Day Health Care sites

## **Unique Aspects of Placement:**

AlzOC is an expanding and increasingly diverse senior focused community based service organization. Founded in 1982 by family caregivers to serve dementia caregivers in Orange County, AlzOC became an independent chapter of the national Alzheimer's Association in 1985. In 2015, AlzOC disaffiliated from the national organization and has had an expanding scope of services since. In 2019, AlzOC reached 34,526 people in Orange County through a variety of services and programs. A significant part of this success is due to unique partnerships with local health care providers as well as with ethnic and cultural community based organizations in Orange County. AlzOC now includes two adult day health centers (in Garden Grove and Laguna Woods). Brain health initiatives have expanded to include cognitive screenings and a variety of dementia education workshops and classes. Additionally, AlzOC has significant leadership roles in the Orange County Aging Services Collaborative, Orange County Strategic Plan for Aging, and the Orange County Advance Care Planning Partners, thus impacting the community of senior service providers. Educating the community, health care providers, and senior service providers about Alzheimer's disease and related dementias remains one of the key goals of AlzOC. This mission includes assisting in the development of the next generation of geriatric focused professional social workers by providing practical learning opportunities as well as quality supervision (3 Licensed Clinical Social Workers on staff in Programs & Education) and mentorship tailored to the needs and goals of the individual student.

# **Beach Cities Health District**

## **Opportunity:**

Beach Cities Health District (BCHD) Community Services Department offers a robust intern training program operating from a strength-based environment for those interested in working with older adults and adults with disabilities. Interns are provided weekly individual supervision, attend weekly staff case conferences and are given ongoing learning opportunities from various departments in the agency.

Interns are asked to manage a caseload of clients, providing bio/psycho/social and ADL/IADL assessments, and developing client-specific care plans. They will engage with clients and their support systems by phone and in-person on a regular basis. This work includes coordinating subsidized services such as non-medical home care and incontinence supplies, overseeing volunteer support, and employing other interventions around mental health, life transitions, and grief and loss. They may work with clients that are involved in community and government assistance programs and help with eligibility for such programs. Interns can also provide short term mental health counseling to clients that indicate a desire for it.

Our BCHD staff will train interns to answer calls and questions on our community information and referral warmline. In addition, interns can participate in the district's groups and programs for the wider community, including health fairs, support groups, and trainings.

## **Unique Aspects of Placement:**

Beach Cities Health District (BCHD) is a healthcare district focused on preventive health and serves the communities of Hermosa Beach, Manhattan Beach and Redondo Beach. Established in 1955 as a public agency, it offers an extensive range of dynamic health and wellness programs, with innovative services and facilities to promote health and prevent diseases across the lifespan.

- **INTEGRATION INTO AGENCY AT LARGE:** participation in quarterly agency-wide state of the district meetings and other fun events BCHD hosts throughout the year, including our work wellness program and discounted gym membership.
- **EXPOSURE TO PUBLICLY FUNDED HEALTHCARE DISTRICT:** opportunity to see how a publicly funded healthcare district operates, including participation in monthly board meetings and strategic development days.
- **ONGOING CLINICAL TRAINING:** participation in robust clinical training facilitated by our team of seasoned social workers at onset of internship and on a monthly basis throughout the internship.

# Huntington Health Senior Care Network

## Opportunity:

Our GSWEC interns can work in several different programs, including the following:

- Resource Center – A free service to the community where social workers conduct brief needs assessments, provide referrals/resources, and complete intakes for care management programs. This is an opportunity to learn in-depth about community resources and public benefits, talk with community members in need both face-to-face and by phone, connect them with resources, and provide short-term care management follow-up as needed.
- Long Term Care Management – We have two long-term care management programs for Medi-Cal recipients. The Assisted Living Waiver Program (ALW) works with individuals 21 and older residing in Assisted Living Facilities and the Multipurpose Senior Services Program (MSSP) works with individuals 65 and older who live at home and are at risk for placement in a Skilled Nursing Facility. These programs offer the opportunity to meet face-to-face with clients where they live, monitor their care plan, assess and provide social work interventions as needs arise.
- Navigation – Short Term Care Management for individuals identified at the hospital as needing follow-up once they discharge home. This is an opportunity to provide follow-up post-hospital care transition services, link individuals with community resources, health plan and public benefits, and provide short term care management services as needed.
- Macro Opportunity – Macro Internship - Senior Care Network has a macro internship available for one student interested in engaging in program planning, implementation, and evaluation. Specifics of the internship are arranged with the student's learning goals in mind and may include creating and distributing client surveys, monitoring program compliance, utilization review of client records, community outreach, client records management, and overseeing volunteers.

## Unique Aspects of Placement:

Intern Learning Opportunities:

- Students will have the opportunity to learn the following skills:
  - Biopsychosocial Assessment
  - Cognition Assessment and Intervention
  - Depression Assessment and Intervention
  - Care Plan Development and Interdisciplinary collaboration
  - Referrals and Resources provision
  - Grant writing opportunities
  - Caregiver Burnout Assessment and Intervention
  - Fall Risk Assessment and Intervention
  - Overall Safety Assessment
  - Socialization/Isolation Prevention and Intervention
  - Cultural competencies and working with clients and families whose native language is not English, use of interpretation services
  - Performance Improvement methodologies and processes
- Senior Care Network is a department of Huntington Health, an affiliate of Cedars-Sinai. Thanks to our connection with Huntington Hospital, interns have the opportunity to rotate into the hospital during the second semester.

Additional Trainings:

- Monthly educational trainings, hospital didactics and motivational interviewing practice sessions

Employment Opportunities:

- Currently Senior Care Network has 9 GSWEC Alumni employees. Senior Care Network is committed to hiring strong former GSWEC students after graduation when possible.

# **Jewish Family Service of Los Angeles – Felicia Mahood and Jonah Goldrich Multipurpose Senior Center**

## **Opportunity:**

Founded in 1854, the Hebrew Benevolent Society became Jewish Family Service in 1946 to reflect its wide array of services. Today, Jewish Family Service LA has earned a national and international reputation as a model for excellence in services for children, families, people experiencing food insecurity, people in need of mental health assistance, individuals with diverse abilities, survivors of domestic abuse, and older adults, and more.

We provide three types of case management programs to make sure seniors who live in our catchment areas continue to age safely and independently in their homes. Those programs are: LA Department of Aging IIIIB Program, Holocaust Survivors Program, and Beverly Hills Program. Through our in-person or phone Intakes, an assigned Social Worker provides information and referral, consultation, crisis intervention, assistance with completing forms and applying for grants or governmental benefits and offer other short-term interventions.

The Intern will carry a caseload of clients from one or more case management programs and will be assigned to an Intake duty on a weekly basis. The Intern will learn how to complete home visits, administer bio-psycho-social assessments, and create care plans. They will learn to assess suicidality, depression, level of cognition, and other mental health issues. The Intern will learn how to complete grant applications and how to advocate on clients' behalf. The Intern will learn how to complete proper documentation in our Evolv client database and will be trained about governmental benefits for low-income seniors as well as many other community resources. The Intern will be part of the social work staff team and will attend all staff meetings and trainings offered on the days they are at their internships. Finally, the Intern may have the opportunity to co-facilitate a support group.

A typical day may consist of doing one or more home visits with clients or staying in the office to meet with Intake clients or answer Intake phone calls. It may include attending a staff meeting or training as well as completing needed documentation for a client, such as assessments, care plans, progress notes, check requests, grant applications and other needed paperwork. Interns also will be meeting for one-hour formal supervision with their instructors and informally with their preceptors for additional trainings.

## **Unique Aspects of Placement:**

Interns will be trained together with staff about various community resources and how to complete applications for Cal Fresh, Medical, and In Home Supportive Services through ongoing presentations offered at staff meetings by internal programs as well as external agencies such as Center for Health Care Rights and Bet Tzedek. Interns will also have the unique opportunity to work with Holocaust survivors and their families and/or with caregivers of those with memory impairment and chronic health issues.

# **Motion Picture and Television Fund – Elder Connection Program**

## **Opportunity:**

The student would have the opportunity to intern with MPTF's Elder Connection Program, which provides services to entertainment industry professionals 65-years of age and older in the community. The program can assist the "industry member", their families and/or caregivers as they face a myriad of issues related to aging. He or she would have the opportunity to experience the unique complexities of the entertainment industry, while developing their own practice skills with an aging population. Many of our clients receive comprehensive case management, including care coordination, linkages to appropriate resources and referrals, and the provision of supportive counseling. The intern will learn how to conduct biopsychosocial assessments, clinical geriatric assessments (e.g., Geriatric Depression scale, Mini Mental Status Exam, etc.) and develop/implement case plans with clients, families, caregivers and other professionals. The Elder Connection Program works with various modalities, including individuals, couples and families. Services provided may include comprehensive case management, crisis intervention, supportive counseling, financial assistance and educating clients around both the aging process and end of life issues. The Intern will experience working with clients in home settings, assisted living facilities, hospitals and rehabilitation facilities. Interns would also have the possibility of co-facilitating various groups that MPTF offers, including grief/bereavement groups and other 4fts. evidenced based groups. Although the primary focus of practice is micro, the intern will have the opportunity to gain a greater understanding of the micro/mezzo/macro interplay in the field of aging, particularly as this relates to the clients MPTF serves.

For students who are interested in experiencing social work with a medical model emphasis, there is the possibility of integrating a one day a week rotation at our Wasserman campus location, located in Woodland Hills. Students who choose this internship option would have the additional opportunity to have a portion of their internship on the retirement campus with a dynamic team of social workers. This additional internship option provides students with learning experiences through collaboration within a multidisciplinary team (i.e., physician, nursing staff, activities, and chaplaincy). The intern would have the opportunity to work in various modalities including individuals, couples and families. The internship would include a rotation through the various levels of care (i.e., RCFE, Long-Term Care, Secured Dementia Unit, etc.) allowing the student to gather a deeper understanding of options and issues that arise in community care facilities.

## **Unique Aspects of Placement:**

MPTF's Elder Connection program is a trusted resource for entertainment industry members and their parents who face challenges living on their own or may have had a sudden life event that requires an urgent intervention. MPTF's retirement community has, for generations, been at the center of MPTF's legacy to countless people in the entertainment industry who seek a warm, inviting, supportive place to spend their retirement years. MPTF is non-profit organization that provides a full continuum of services for older adults on its 44-acre community located in the west San Fernando Valley. Services include a Residential Care Facility for the elderly (RCFE), which focuses on independent and assisted living; a 40-bed Long Term Care community for residents who need 24 hour care and 30-bed unit for residents with Alzheimer's and other forms of dementia.

The mission of the Elder Connection Program is to provide exemplary psychosocial interventions to entertainment industry individuals, families and our communities; to prevent and alleviate suffering and to maximize quality of life. Our social work practice is guided by core values of holistic care, justice, self-determination and advocacy for industry members, their parents and caregivers through continuously evolving programs and services designed to meet their health and human service needs.

# **Motion Picture and Television Fund – Skilled Nursing Program**

## **Opportunity:**

The student would have the opportunity to intern within MPTF's Skilled Nursing Facility which provides services to entertainment industry professionals. MPTF's skilled nursing facility currently houses 70 residents between our Long-Term Care and Secure Dementia Unit. The intern would have the opportunity to experience the unique complexities of the entertainment industry, while developing their own practice skills with residents who live in a long-term care setting. The intern will learn how to conduct biopsychosocial assessments, clinical geriatric assessments (e.g., Geriatric Depression scale, Mini Mental Status Exam, etc.) and develop/implement case plans with clients, families, medical staff and other professionals involved in the care of the resident. The long-term care social workers and intern work with various modalities, including individuals, couples and families. Services provided may include comprehensive case management, crisis intervention, supportive counseling, and educating and providing therapy to the resident around both the aging process and end of life issues. The Intern will experience working with clients in their home settings, Interns may have the possibility of co-facilitating various groups that MPTF offers including grief/bereavement groups and other evidenced based groups. Although the primary focus of practice is micro, the intern will have the opportunity to gain a greater understanding of the micro/mezzo/macro interplay in the field of aging, particularly as this relates to the clients MPTF serves.

# **Motion Picture and Television Fund – Innovation/Engagement**

## **Opportunity:**

MPTF's mission is to support the entertainment community in living and aging well, with dignity and purpose, and in helping each other in times of need. MPTF's social work practice is guided by core values of holistic care, social justice, self-determination and advocacy for industry members, their parents and caregivers through continuously evolving programs and services designed to meet their health and human service needs.

The Innovation department at the Motion Picture & Television Fund (MPTF) is excited to offer a macro focused GSWEC internship. We can provide an in-person or hybrid internship in which students will support the Innovation department in collaborating with other departments to deliver innovative programming for older adults living on MPTF's senior living campus and in the community. There is an opportunity to work with the Engagement department on development and evaluation of an intergenerational career mentorship program which pairs younger adults starting their careers in the entertainment industry with older adults who have retired from the industry. For this project, interns will help develop a toolkit, conduct outreach to other organizations we would like to partner with, facilitate mentor/mentee training and matches, and assist with evaluation of the program through survey administration and feedback sessions. Interns will also support Innovation pilot projects in collaboration with the Social Services department, Nursing staff, and Recreation and Activities departments. Interns will help Innovation staff implement and evaluate projects. Finally, interns are encouraged to gain experience working one-on-one with residents living on campus by providing technology support (e.g., helping residents use their smart phones or computers) which is a current project MPTF has been under taking. There will also be opportunities to gain micro/mezzo skills working directly with residents and community dwelling older adults in a clinical, case management capacity.

## **Unique Aspects of Placement:**

100 years ago, our founder, Mary Pickford, set the bar when she said, "We see a need, and we fill it." What began in 1921 is more relevant today than ever. MPTF supports working and retired members of the entertainment community with a safety net of health and social services, including temporary financial assistance, case management, and residential living. From childcare to living and aging well with dignity and purpose, MPTF is there to guide the industry workforce through the enormous obstacles life presents. For nearly 100 years, the extraordinary generosity of the entertainment community has enabled MPTF to deliver charitable services to industry members in need. MPTF is a 501(c)(3) nonprofit, tax-exempt charitable organization.

# **Motion Picture and Television Fund – Palliative Care Program**

## **Opportunity:**

The student would have the opportunity to intern with MPTF's Palliative Care Program which provides wrap around palliative care services to entertainment industry professionals and their families. MPTF's Palliative Care Program currently partners with UCLA medical care to provide outpatient palliative care to industry members and/or their families that have been diagnosed with a life altering illness. Unlike hospice where an individual needs to be given a life ending diagnosis, palliative care is designed to work concurrently with other medical treatments that the individual may be pursuing. The Palliative Care team is made up of a medical doctor, a social worker, a nurse practitioner and a chaplain. This team is designed to take care of the medical, social and spiritual needs of the individual and their family as they tackle their diagnosis.

The intern would have the opportunity to experience the unique complexities of the entertainment industry, while developing their own practice skills with clients who have been diagnosed with a life altering illness. The intern will learn how to conduct biopsychosocial assessments, clinical geriatric assessments (e.g., Geriatric Depression scale, Mini Mental Status Exam, etc.) and develop/implement case plans with clients, families, medical staff and other professionals involved in the care of the client. The palliative care social worker and intern work with various modalities, including individuals, couples and families. Services provided may include comprehensive case management, crisis intervention, supportive counseling, and educating and providing therapy to the client and their family. The intern will experience working with clients in both a community based medical setting as well as individual home settings. Interns may have the possibility of co-facilitating various groups that MPTF offers including grief/bereavement groups. Although the primary focus of practice is micro, the intern will have the opportunity to gain a greater understanding of the micro/mezzo/macro interplay in the field of palliative care, particularly as this relates to the clients MPTF serves.

## **Unique Aspects of Placement:**

MPTF's retirement community has, for generations, been at the center of MPTF's legacy to countless people in the entertainment industry who seek a warm, inviting, supportive place to spend their retirement years. MPTF is non-profit organization that provides a full continuum of services for older adults on its 44-acre community located in the west San Fernando Valley. Services include a Residential Care Facility for the elderly (RCFE), which focuses on independent and assisted living; a 40-bed Long Term Care community for residents who need 24-hour care and 30-bed unit for residents with Alzheimer's and other forms of dementia.

## **Opportunity:**

Opportunity to work as part of a multidisciplinary team in a cutting-edge PEI/FSP/MHSA program. Individual, family and group therapy, case management, individual and community outreach. Learn the DMH documentation requirements and standards. Students also have an opportunity to do a macro project. Some projects which former students have done include compiling resources for the API Older Adults, Community resource fair for the older adults, educational workshop at a local community center, organizing an activity event for the older adults. Students will also have the opportunity to facilitate an activity group with clients. Students will also participate in intern training and group supervision with the Pacific Clinics Training Institute on a variety of topics specific for mental health settings.

## **Unique Aspects of Placement:**

NOW (Nurturing Older Adult Wellness) uses a multidisciplinary team approach (doctor, nurse, case manager, therapist, and service extenders) to serve the older adults; a field-based program which works with the older adults and their family members/caregivers, with an emphasis on treatment, prevention and early intervention. It is an integrated approach on health, mental health, and substance abuse. We emphasize the provision of culturally and linguistically competent mental health services to the API Older Adults, their family members and/or caregivers.

# **Pacific Clinics –Older Adult, PEI/FSP/MHSA**

## **Opportunity:**

Opportunity to work as part of a multidisciplinary team in a cutting-edge PEI/FSP/MHSA program. Opportunity to work with chronically mentally ill clients with a multitude of stressors and to provide individual, family, and group therapy, case management, individual and community outreach. Opportunity to see clients in clinic setting and also to do field-based work, visiting with clients in a multitude of settings, including hospitals, client homes, parks, etc. In this setting you will have an opportunity to diagnose and treat clients, develop treatment plans, do initial assessments including a mental status exam. You will administer several assessments, including MMSE, Geriatric Depression Screenings and others. You will also complete outcome studies with clients. Learn the DMH documentation requirements and standards. Students also have an opportunity to do a macro project. Students will also have the opportunity to facilitate an activity group with clients. Students will also participate in intern training and group supervision with the Pacific Clinics Training Institute on a variety of topics specific for mental health settings.

## **Unique Aspects of Placement:**

All our programs use a multidisciplinary team approach (doctor, nurse, case manager, therapist, and service extenders) to serve the older adults. These programs save lives! We work intensively with our clients, assisting them with therapy, case management, medication. In addition, we can assist with housing, food, clothing, etc. These are cutting edge programs that work with severe clients, with a multitude of problems in addition to mental health issues. Furthermore, we have integrated health measures and substance abuse measures to ensure clients can meet their health and substance abuse recovery needs. Interns will have their own caseload but work as a part of a team. Interns attend staff meetings when possible. Pacific Clinics has a Training Institute and interns attend a series of trainings to enhance their clinical skills.

- Opportunity to see clients in clinic setting and also to do field-based work, visiting with clients in the office, in client homes, in assisted living facilities, and/or board/care facilities.
- Opportunity to provide psychoeducation to individuals, family, caregivers, and group.
- Opportunities to assess risk factors (i.e., substance abuse, self-neglect, social isolation, etc.) and help identify protective factors.
- Opportunity to evaluate client's activities of daily living (ADL) and instrumental activities of daily living (IADL).

In this setting you will have an opportunity to diagnose and treat clients, develop treatment plans, do initial assessments including a mental status exam. You will administer several assessments, including MMSE, Geriatric Depression Screenings and others. You will also complete outcome studies with clients. Learn the DMH documentation requirements and standards.

## **Unique Aspects of Placement:**

- Specially trained in issues commonly facing older adults such as major depression, anxiety, signs of dementia, grieving, isolation, and other emotional and social challenges.

# **Partners in Care Foundation – Community Wellness Department**

## **Opportunities:**

The GSWEC student will be involved in the implementation of the City and County of Los Angeles III-D Evidence-Based Programs for Disease Prevention and Health Promotion. The GSWEC student will be trained as a workshop leader for a maximum of two evidence-based programs, which may include: the Chronic Disease Self-Management program, A Matter of Balance, Arthritis Foundation Exercise Program, or Arthritis Foundation Walk with Ease. The student will co-lead these workshops, provide community outreach/marketing, and assist with program development.

## **Unique Aspects of Placement:**

This internship provides the opportunity to provide services in many diverse locations throughout the City and County of Los Angeles and to work with many ethnic populations. As a workshop co-leader, you will work with many staff throughout your internship, each providing you with mentorship and sharing their own professional style with you.

# **Partners in Care Foundation – Home and Community Based Alternatives**

## **Opportunity:**

Home Community Based Alternatives (HCBA) Medi-Cal Waiver services medically fragile participants ranging in age from infants to older adults. HCBA allows Medi-Cal beneficiaries with high level care needs to continue to live in the community by identifying and ensuring they receive services that will sustain their health and safety outside of an institution. HCBA will provide the student an opportunity to develop the following competencies: psychosocial assessments, home safety evaluations, crisis intervention, care plan development, interdisciplinary team meetings, referrals and services, care plan implementation, field visits, collaboration and partnering with various waiver service providers, and other opportunities for professional development.

## **Unique Aspects of Placement:**

Case Assignments for student interns may include up to (10) participants with responsibilities to include: conducting monthly phone contacts, case note entries, home visits, case conferencing, referrals, and development of care plans for medically fragile participants living in the community.

# **SCAN Health Plan**

## **Opportunity:**

To complete MSW 2<sup>nd</sup> year internship with SCAN Health Plan. There are two possible opportunities within SCAN:

- 1) At Independence at Home (IAH), which is the community services arm of SCAN Health Plan. Services are provided to the community at large (Not SCAN Members) under the following categories:
  - a. Case Management
    - i. MSSP (Medical-waiver program) – 65 plus with Medical and functional deficits.
    - ii. Homeless Services program – 55+ experiencing housing insecurity.
  - b. Behavioral Health Services – 55+ and family caregivers of 55+ having difficulties accessing BH services anywhere else.
- 2) SCAN Health Plan, a Medicare Advantage Health Plan.
  - a. Possible Case Management Setting

## **Unique Aspects of Placement:**

- Both settings provide MSW Interns with the opportunity to complete their internships in the Long Beach and surrounding areas.
- Interns will benefit from learning from our interdisciplinary teams, which includes MSW's, LCSW's, RN's, Gerontologists, and Case Managers, on both Settings (SCAN and IAH).

# **Special Services for Groups/Sustaining Independent Lives with Vital Empowering Resources**

## **Opportunity:**

Students placed at SSG/SILVER will have an opportunity to see clients flow through different levels of care from brief case management and mental health intervention to intensive case management and comprehensive mental health intervention including medication management. Students will also work with family caregivers and address systems issues within the home environment. While SSG has many divisions, students should be advised that the placement will be with SILVER and rotation with other divisions will not be available.

## **Unique Aspects of Placement:**

SSG/SILVER does have funding from DMH to work with clients starting from Prevention and Early intervention to Full Scope intensive mental health treatment (24/7 crisis management). SSG/SILVER also work with several community partners to address the needs of the culturally diverse clientele that we serve, including those who are housing insecure. Students will have an opportunity to learn about various culturally specific interventions and be able to incorporate their learning into better assessment and evaluation of clients.

# **VA Greater Los Angeles Healthcare System Sepulveda Ambulatory Care & West Los Angeles Healthcare Center**

## **Opportunity:**

VA operates the largest and most comprehensive clinical training program for social workers. VA is affiliated with over 230 graduate schools of social work and train approximately 1,500 master's in social work interns a year.

We provide primary care in the innovative medical home model, tertiary inpatient and ambulatory care (acute, sub-acute, rehabilitation, extended care, dementia unit), mental health services, mental health integrated care, adult day healthcare, home healthcare, homeless services, hospice, palliative care, nursing home, geriatric medicine, geropsychiatry, and substance abuse treatment, all with an interdisciplinary focus.

Unlike other programs, the VA offers interdisciplinary teamwork, which means that each member of the team is of equal value but holds different types of expertise. The patient is part of the team, and the team goal is patient centered care.

Multidisciplinary teams rely on a hierarchy with medicine in the leadership role. Interdisciplinary or interprofessional teams share leadership with all team members. It's a hallmark of GSWEC and important to develop a skill set to deal with these teams.

*We strongly recommend attending the GSWEC Open House (February) and the VA GSWEC Open House (March) for up-to-date information on placement opportunities, as there could be additional options not listed below.*

## **CONTRACT NURSING HOME AND ADULT DAY HEALTH CARE PROGRAM – SEPULVEDA**

This is a great opportunity for a social work intern to work with Veterans who are authorized services at various VA contracted nursing homes and Adult Day Health Care facilities in the community. The social work intern will be responsible to provide a variety of services including but not limited to psychosocial assessments, facilitate placements, discharge planning, case management, advocacy, psychosocial education, and coordinating linkages with appropriate VA and community service providers / agencies as needed. The internship may involve visiting Veteran's in the community throughout the GLAHS catchment area.

## **COMMUNITY RESIDENTIAL CARE (CRC) PROGRAM - SEPULVEDA**

CRC housing is group home or residential facility, where health care supervision is provided to individuals in a residential setting rather than their own home or family's home, because the person is unable to live independently, due to medical or psychiatric conditions, and may not have social support to provide the needed supervision and supportive care. The CRC Program offers case management services for Veteran residents in VA-approved CRC facilities, and oversight of VA-approved facilities. The social work intern in this program will work closely with the CRC placement coordinator to provide services to Veteran's from both an inpatient and outpatient perspective.

## **ADULT DAY HEALTH CARE PROGRAM - SEPULVEDA**

The ADHC is a structured day program for the physically and/or cognitively impaired older or disabled adult who can benefit from a supportive environment. The ADHC provides socialization, health monitoring, individual exercise program, cognitive and therapeutic activities and day respite for caregivers. We assist Veterans and caregivers to remain safely in their home environment with support.

This is a day program with strong Mental Health Component including intensive case management, individual Counseling and Group Therapy (Reminiscence and Therapeutic 'process' groups), Caregiver Support and Education, utilizing an interdisciplinary team approach.

### **MENTAL HEALTH CLINIC- SEPULVEDA**

The Social Work Intern will provide mental health care in the general Mental Health Clinic in coordination with a behavioral health interprofessional team. Services include crisis intervention and management, diagnostic evaluation/assessment, determining a comprehensive treatment plan which may include psychiatric medication, individual and/or group treatment, as well as provide linkages to VA and community-based resources. The Social Work Intern will provide group and individual psychotherapy using evidence-based treatment in an outpatient setting to address a range of disorders including trauma-related, mood and anxiety disorders; will also Learn / implement Cognitive Behavioral and Mindfulness modalities.

### **PATIENT ALIGNED CARE TEAM SEPULVEDA (PACT)**

The Social Work Intern will assess and treat the complicated psychosocial problems of Veterans, families, and caregivers in an outpatient primary care setting. The intern will provide assessment of homeless and other psychosocial problems that cause distress, such as adjustment to the current medical condition and/or functional status, untreated or under-treated mental health or substance abuse condition, economic instability, legal problems, and inadequate social supports, housing, and transportation.

The intern will provide case management services and interventions to increase adherence to treatment plans and access to care, transportation assistance, Advance Directive education, economic assistance, and strategies to increase income, assist in locating housing resources to assist with functional decline.

### **GERIATRIC PATIENT ALIGNED CARE TEAM SEPULVEDA (GERI-PACT)**

Geri-PACT is a primary care clinic focused specifically on working with older adults with memory impairment. The Social Worker in this clinic will work with an interdisciplinary team to provide care for the Veteran and their caregivers. This placement will involve the same functions as the PACT Social Work position listed above, with a concentrated focus on geriatrics.

### **PREOPERATIVE CLINIC - WEST LOS ANGELES**

The WLA Pre-op clinic is an outpatient clinic. The clinic provides in-person and telephone pre-op evaluations. The social worker in the Pre-op clinic will be providing education and information to Veterans about Advance Directive. The SW Intern will assess and assist with various psychosocial and case management needs and provide supportive interventions as needed. Intern will also have an opportunity to provide social work interventions on the inpatient Med-Surg. Units. Some of the duties would include: complete psychosocial assessments, case management, collaborating with inpatient treatment teams, discharge planning.

### **Unique Aspects of VA Social Work Internship Placement:**

The VA offers a rich experience for students including clinical care, research, and education. We provide primary, tertiary inpatient and ambulatory care (acute, sub- acute, rehabilitation, extended care), mental health services, mental health integrated care, adult day healthcare, home healthcare, homeless services, hospice, innovative research in geriatrics, palliative care, geriatric medicine, geropsychiatry, neurobehavior, and substance abuse treatment, all with an interdisciplinary focus.

We also partner with the GRECC (Geriatric Research Education Clinical Center) which offers a broad spectrum of macro-opportunities including program development, evaluation, research, and educational opportunities.

Interns are not eligible for the Federal Employee Retirement System. However, if an intern later becomes a federal employee, time spent in internship status can be credited toward retirement. The VA is interested in offering jobs to former interns, and they are encouraged to apply for federal employment, which would begin after completion of degree requirements.

# [VA Long Beach - Tibor Rubin VA Medical Center](#)

## Opportunity:

VA is a leader in the provision of innovative geriatric care models, including the Patient Aligned Care Team (PACT), telehealth, rehabilitation services, long term services and supports (including nonskilled care), and contracting with community-based services to support living at home. VA makes these resources available to help health care professionals provide quality care to Veterans, their families, their caregivers, and all older Americans.

## Geriatrics and Extended Care Program (<https://www.patientcare.va.gov/geriatrics.asp>)

The shared purpose of all Geriatric and Extended Care programs is to prevent or lessen the burden of disability on older, frail, chronically ill patients, and their families/caregivers, and to maximize each patient's functional independence. Because the course of chronic illness varies, the health care needs of the chronically ill patient also change, requiring the services of one, some, or all Geriatrics and Extended Care services over time. Community Residential Care, VA Community Living Centers, Community Nursing Homes, and State Veteran Homes assist Veterans who are not able to live independently. Geriatric Research Education and Clinical Centers support the advancement and integration of research, education, and clinical achievements. Geriatric Evaluation & Management, Geriatric Primary Care, and Inpatient Respite offers interdisciplinary inpatient or outpatient services to elderly patients. Hospice and Palliative Care offer a continuum of comfort-oriented and supportive services provided in the home, community, outpatient, or inpatient settings for persons with advanced illness.

The Office of Geriatrics and Extended Care advances quality care for aging and chronically ill Veterans by providing policy direction for the development, coordination, and integration of geriatrics and long-term care clinical programs, and for the advancement of geriatrics and long-term care through research, education, and evaluation of new clinical models. (<https://www.va.gov/geriatrics/>)

## Adult Day Health Care (ADHC)

Adult Day Health Care programs provide health maintenance and rehabilitative services to Veterans in a group setting during daytime hours. VA introduced this program in 1985. In 2008, VA operated 21 programs directly and provided purchased ADHC services at 113 VA medical centers. One state home provides ADHC services.

Adult Day Health Care is an outpatient day program that provides health maintenance and rehabilitative services to frail elderly and functionally impaired veterans. These services are delivered by a team of health professionals and support staff that strives to help participants and their caregivers develop the knowledge and skills necessary to manage care in the home.

Adult Day Health Care - [https://www.va.gov/GERIATRICAL/pages/Adult\\_Day\\_Health\\_Care.asp](https://www.va.gov/GERIATRICAL/pages/Adult_Day_Health_Care.asp)

## Geriatric Research, Education and Clinical Centers (GRECC)

These centers increase the basic knowledge of aging for health care providers and improve the quality of care through the development of improved models of clinical services

and a wide variety of educational activities targeting VA staff and trainees from the full range of health disciplines.

Each GRECC has an identified one or more foci of research in the basic biomedical, clinical and health services area.

Begun in 1975, there are now 20 GRECCs in all but two of VA's health care networks.

Geriatric Research Education and Clinical Centers (the GRECCs) are designed for the advancement and integration of research, education, and clinical achievements in geriatrics and gerontology into the total VA healthcare system. All of the GRECCs focus on various aspects in the quality of life and care for the aging veterans and are the forefront of leading-edge research and education. (<https://www.va.gov/grecc/>)

## Home-Based Primary Care

This Program (formerly Hospital Based Home Care) began in 1970 and provides long-term primary medical care to chronically ill veterans in their own homes under the coordinated care of an interdisciplinary treatment team. This program has led to guidelines for medical education in home care, use of emerging technology in home care and improved care for Veterans with dementia and their families who support them. In 2008, home-based primary care programs were located in 128 VA medical centers.

Home-Based Primary Care provides primary health care to homebound patients that live in the community. HPBC is designed to serve the chronically ill through the months and years before death, providing primary care, palliative care,

rehabilitation, disease management and coordination or care services. Home Based Primary Care  
- [https://www.va.gov/GERIATRICALS/pages/Home\\_Based\\_Primary\\_Care.asp](https://www.va.gov/GERIATRICALS/pages/Home_Based_Primary_Care.asp)

#### Homemaker and Home Health Aide (H/HHA)

VA began a program in 1993 of health-related services for service-connected Veterans needing nursing home care. These services are provided in the community by public and private agencies under a system of case management provided directly by BA staff. In 1999, this program was expanded to cover all enrolled Veterans. VA purchased H/HHA services at 142 medical centers in 2008.

Provides clinical expertise in home and community coordination, provision of the continuity of care, and referral of patients to community agencies, VA programs, including skilled home health aide, and adult day health care. They also function as a liaison to community agencies, as well as monitor their services. Homemaker and Home Health Aide Care  
- [https://www.va.gov/GERIATRICALS/pages/Homemaker\\_and\\_Home\\_Health\\_Aide\\_Care.asp](https://www.va.gov/GERIATRICALS/pages/Homemaker_and_Home_Health_Aide_Care.asp)

#### Respite Care

Respite care temporarily relieves the spouse or other caregiver from the burden of caring for a chronically ill or disabled Veteran at home. In the past, respite care admission was limited to an institutional setting, typically a VA nursing home. The Veterans Millennium Health Care and Benefits Act expanded respite care to home and other community settings, and home respite care was provided at 122 VA medical centers in fiscal year 2008. Currently, institutional respite care programs operate in 136 VA nursing home care units. Respite care is usually limited to 30 days per year.

Respite Care provides temporary relief, assistance and support to those veterans and their primary caregiver/family who are dealing with long-term disability/chronic illness in their home. Respite can be provided in an adult day facility to provide rest to the full-time caregivers, this option should not be confused with the provision of adult day care services to veterans for therapeutic activities to enhance their physical and emotional well-being. #### Guide to Long Term Care

In addition to enhanced information on the Institutional and Non-Institutional Care Programs listed above, the INTERNET website has information on:

- [Shared Decision Making for Long Term Care](#)
- [Paying for Long Term Care](#)
- [Helpful Websites for Veterans and Caregivers](#)

Tibor Rubin VA Medical Center Geriatrics Program is focused on older adult senior care. Conditions may include memory problems, sleep problems, falls, bone loss or weight loss. Tibor Rubin VA Medical Center assesses the Veteran's situation and condition to decide which geriatric services are right for the Veteran and then coordinate their care.

Tibor Rubin VA's team of specialists provides geriatric services that include:

Outpatient Geriatric Services

Inpatient Geriatric Services (Community Living Center)

Medicine and nursing

Psychology, psychiatry, and social work

Physical and occupational therapy  
Contract Nursing Home (CNH)  
Adult Day Health Care (ADHC)  
Homemaker Home Health Aide (H/HHA)  
Home-Based Primary Care (HBPC)

**Unique Aspects of Placement:**

Tibor Rubin VA Medical Center offers an in-depth fulfilling intern experience for social work healthcare professional trainees (SWHPTs) that encompasses clinical care, program development/evaluation, outreach, research, and education in a variety of geriatric settings. Tibor Rubin VA Medical Center provides an environment that introduces interns to a national comprehensive continuum of care medical model that fosters a diverse immersive experience with Veterans addressing a multitude of physical and mental health care issues. The SWHPT not only has a primary internship experience in an area of interest, but also could precept and shadow across several other departments. Furthermore, the GSWEC SWHPT will be provided weekly supplemental meetings for additional support and learning in areas such as the Diagnostic and Statistical Manual of Mental Disorders (DSM-5-TR) and research.

# **WISE and Healthy Aging – Adult Day Service Center**

## **Opportunity:**

While working at our Adult Day Service Center (ADSC), interns will be encouraged to sharpen their assessment skills by providing biopsychosocial assessments for older adults who are frail, have impaired cognition, or other psychological diagnoses. In collaboration with ADSC staff, interns will create 6-month care plans suggesting specific interventions to facilitate the goals of social service model adult day services such as decreased social isolation, increased exercise and cognitive stimulation. Interns will be assigned a small caseload of ADSC participants to follow for the duration of their rotation and will intervene as necessary to promote greater integration and participation within the program. Interns will have the option of conducting a small "pull-out" group for specific ADSC participants. The group may focus on reminiscence, cognitive stimulation, or other therapeutic activities.

Somos Amigos, Our Spanish Language Program is designed to offer the same level of engagement, mental stimulation, exercise-strength training and recreation that our English program offers. Somos Amigos ("we are friends") is a diverse group, embracing the cultures and celebrating the traditions of Mexico, Central and South America. We offer two days a week of Spanish language activities. All the internship activities mentioned above are offered through Somos Amigos.

Within the ADSC, we offer a 2 day/week program for individuals with early memory loss called WISEMinds. This research-informed program is comprised of a group of 8-12 individuals who take a proactive approach to memory loss. Interns may rotate through this program, contributing to each client's assessment (in conjunction with our mental health services) and offering one or two program activities each month commensurate with the cognitive capabilities and interests of our group. Curriculum development for these activities will be supervised by our Director of Community Aging Resources and Education.

## **Unique Aspects of Placement:**

The ADSC involves biopsychosocial assessments with a "micro" focus on client behaviors and needs, however, there are plenty of "mezzo" and "macro" experiences interwoven into the program which further the independence and support of client's lives.

# WISE and Healthy Aging – Holistic Elder Abuse Response Team

# **WISE and Healthy Aging – Holistic Elder Abuse Response Team**

## **Opportunity:**

Elder abuse prevention and intervention in community settings: This internship opportunity will support elder and dependent adult abuse survivors through the Holistic Elder Abuse Response Team (HEART), a function of the WISE & Healthy Aging Elder Abuse Prevention Program. HEART provides case management, individual and group counseling, legal system advocacy (attending court, getting restraining orders filed) for elder and dependent adult abuse survivors. This program incorporates pre- and post-testing for depression, anxiety, Post-Traumatic Stress Disorder, and abuse. Services are primarily provided in client's homes or at the agency's Long Beach office. The program is additionally co-located at the Long Beach Police Department. The program conducts weekly tele- support groups for survivors of imposter scams. GSWEC student would be offered the opportunity to participate in the aforementioned roles alongside HEART staff. Additionally, a GSWEC student will be able to conduct trainings to community groups about how to detect abuse and access available resources if one becomes a victim.

Exposure to the elder justice multidisciplinary teams may include all or any of the following:

Los Angeles County Elder Abuse Center of Excellence, Multidisciplinary Team: GSWEC students will have the opportunity to attend meetings to observe this multidisciplinary team that meets weekly to review, consult and take action on the most egregious elder abuse cases in the County. The team is comprised of a geriatrician, neuropsychologist, Adult Protective Services, Ombudsman, Public Guardian, District Attorney's Office, City Attorney's Office, Los Angeles Police Department, Sheriff's Department, other local law enforcement jurisdictions, Department of Mental Health, and the Victim Witness Program.

SCAMS LA Workgroup: Co-chaired by representatives of the Federal Bureau of Investigation and the Los Angeles District Attorney's Office. This group brings together professionals from state, federal, and local public and private agencies who investigate or provide services to victims of mass marketing scams that target older adults. These meetings provide opportunity to network with a variety of professionals and conduct training on topics that are relevant to this group.

Additional Networking and Training opportunities: GSWEC Students will have opportunities to attend select webinars/trainings offered throughout the county.

## **Unique Aspects of Placement:**

The HEART program at WISE & Healthy Aging is the only program of its kind in Los Angeles and one of a handful in the nation that is providing comprehensive services to elder abuse survivors

\*Mileage reimbursement will be provided to GSWEC students in accordance with the agency's mileage reimbursement policy that currently reflects the Federal mileage reimbursement rate.

# **WISE and Healthy Aging – In-Home Services/Care Management**

## **Opportunity:**

While working in Care Management, our ultimate goal with clients is to reduce isolation while connecting clients to needed resources. Each intern will be trained to provide comprehensive care management services which include completion of a very thorough biopsychosocial assessment for clients, development of a written Care Plan with measurable outcomes, arrangement and coordination of services, and client follow-up to monitor the effectiveness of the services. Interns will assist with monthly monitoring through telephone calls and home visits. They will also learn how to determine eligibility for clients and apply for needed benefits such as Medi-Cal, Cal Fresh (food stamps), LIHEAP (for utilities) as well as many other programs and services for older and disabled adults. Interns will become familiar with Cal AIM funding and services.

When working in Information and Referral, interns will be required to answer phone calls and greet visitors seeking resources while evaluating needs to determine what services are required. Interns will refer callers and visitors to the most appropriate internal agency programs or local and community-based programs, including referral services statewide and nationally, as needed.

## **Unique Aspects of Placement:**

Care Management involves biopsychosocial assessments with a "micro" focus on client behaviors and needs, however, there are plenty of "mezzo" and "macro" experiences interwoven into each program which further the independence and support of client's lives.

\*Mileage reimbursement will be provided to GSWEC students in accordance with the agency's mileage reimbursement policy that currently reflects the Federal mileage reimbursement rate.

# **WISE and Healthy Aging – Long Term Care Ombudsman Program**

## **Opportunity:**

The Long-Term Care Ombudsman Program is designed to provide independent oversight over the quality of care in long term care facilities by advocating for resident's health, safety, welfare and rights. Its federally mandated activities include, but are not limited to, complaint investigation, unannounced monitoring visits to licensed long term care facilities, community education, resident and family education. Ombudsman in the state of California also are called to witness advance health care directives executed by residents in skilled nursing facilities; receive mandatory reports of elder and dependent adult abuse and conduct preliminary abuse investigations.

GSWEC students who have the interest, the skill level and capabilities will have additional opportunities to select from that are distinct from traditional internship assignments. The following are distinct GSWEC opportunities:

Elder and dependent adult abuse in long-term care settings: GSWEC students with the necessary capabilities will be additionally trained to conduct elder and dependent adult abuse investigations.

Legislative education and advocacy: Engage in letter writing to support or oppose legislation, conduct visits in district to educate legislators on the impact of budget packages, legislation, and policy implications. Additionally, GSWEC students will have the opportunity to engage with statewide advocacy organizations like the California Elder Justice Coalition, the California Long-Term Care Ombudsman Association, and attend state level advocacy meetings with the regulatory agencies to deal with systemic issues that arise from the field.

Mental health focused rotation. Regular visitation at an Institution for Mentally Disabled (IMD), a locked nursing facility that serves individuals with dementing illnesses and also individuals who have persistent mental illness that require intensive treatment. Some of these facilities have forensic units and clients are ordered to stay at the facility in lieu of time in prison. Additional Networking and Training opportunities: GSWEC students will have opportunities to attend select webinars/trainings offered throughout the county.

## **Unique Aspects of Placement:**

WISE & Healthy Aging is the sole contractor of Long-Term Care Ombudsman Services in Los Angeles and San Bernardino Counties. It is the 2nd largest Ombudsman program in the nation. The Ombudsman internship is robust with learning opportunities and whose ethics are in alignment with and mirror social work ethics. It is an ideal placement for student professional development and exploration in the field of aging.

\*Mileage reimbursement will be provided to GSWEC students in accordance with the agency's mileage reimbursement policy that currently reflects the Federal mileage reimbursement rate.
